

We're leveraging today's best technology and our deep expertise to find new ways to make health care better and more affordable. We're Optum360, a part of the growing family of UnitedHealth Group. Together, we will leverage our compassion, talent, resources and experience using natural language processing to create the next revolution in health care. Let's go. It's time to do **your life's best work.**SM

We are hiring for the following positions in our San Diego office:

- Research Linguist
- NLP Engineer
- NLP Software Engineer

You will be a key contributor in the design and development of state-of-the-art NLP for medical applications. You will work closely with other experts on current and forward-looking company technologies.
